

CLEAR LOOK

presentanova®

SYSTEM

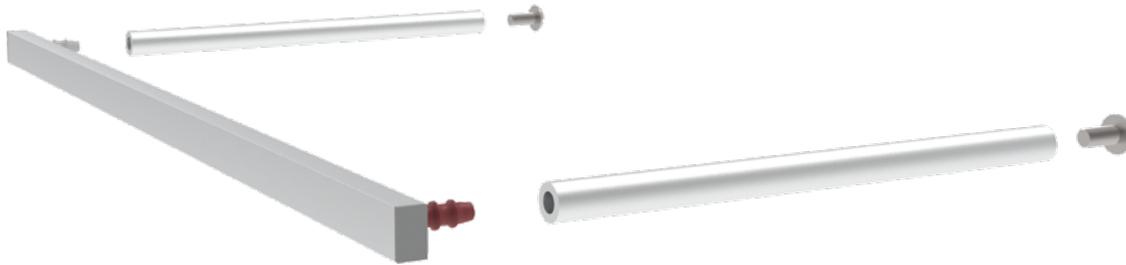

Clear Look displaying system features a simple horizontal bar along with various holders for glasses and accessories. The bar is available with or without LED lighting.

The LED lighting is indirect and shadow-free, integrated into the back of the bar profile.

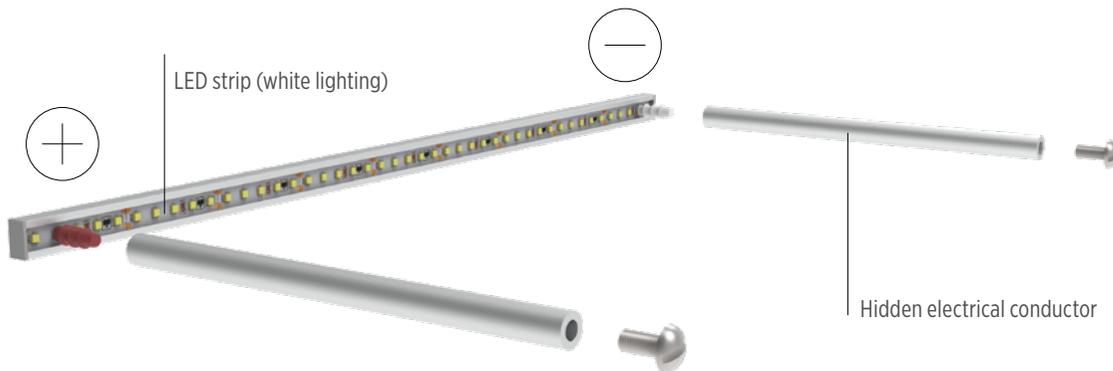

The glasses holders are made of transparent polycarbonate, giving the impression that the glasses are floating. They offer a very minimalist, clean, and simple design.

BARS

FRONT VIEW
(CL.R / CL.RE)

BACK VIEW
(CL.RE)

CL.R
Custom-sized aluminum bar with wall mounts (two per meter). The aluminum bar is sold by the meter.

CL.RE
Aluminum bar with integrated white LED lighting and wall mounts (two per meter).

CLE.E.KIT
The electrical kit required for a successful lighting installation includes copper wiring and a transformer. It is sold separately.

For more information, contact us.

INSTALLATION

DISTANCE FROM THE WALL

DISTANCE BETWEEN FRAMES

The recommended distance between frames is at least 175 mm.

CL.WM.1

Installation on a panel without rear access requires the use of CL.WM.1 fasteners.

This particular front-facing installation does not accommodate the CL.RE bar with integrated LED lighting.

CL.WM.2

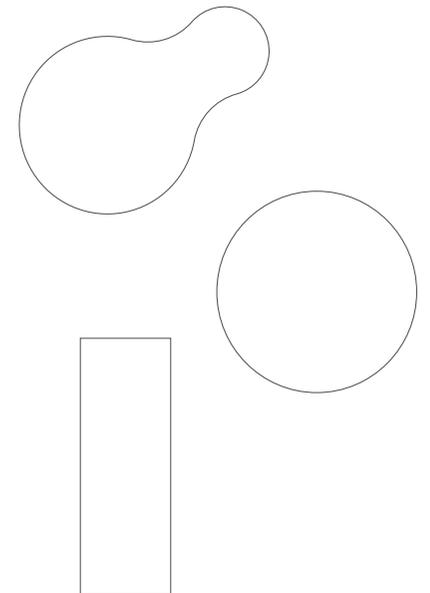

Installation on the rear panel requires the use of CL.WM.2 fasteners.

PANELS

The system can be installed on various surfaces and panels. For more information, please contact us.

Our standard panels are available in matte white acrylic, white LED acrylic, all with custom printing options and various shapes available.

The standard dimensions of our panels are: 900/700/450x1500x280 mm
